NAVIGO

Scrumptious Odyssey

- The idea is to have something crackling/crunchy/brittle
- The dish is made of 2 components like the NAVIGO pass (the card and the card holder)
- The card is made using whipped egg whites in the presence of potassium bi tartrate ($KC_4H_5O_6$), corn starch and coloured with food colourant i.e. Brilliant Blue FCF (E133); gradient of colour → shaped in a NAVIGO pass (Filling)
- The card holder is made using isomalt cooked at $160^\circ C$ and cooled down. And poured into molds of card holder shape (Outer shell)
- Assemble the dish and plate it

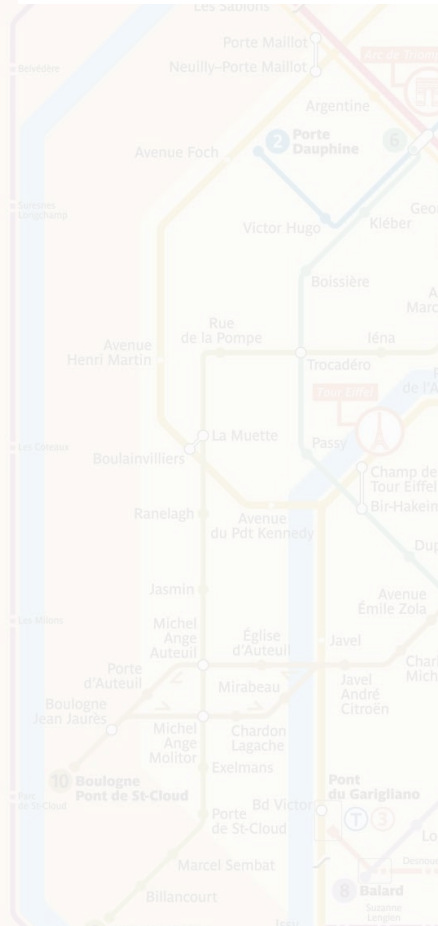

Scrumptious Odyssey: DSF formula

1. $(D_0(S1)KC_4H_5O_6 + D_0(S2)E133) / (D_2(S3)\text{corn starch} \times D_2(S4)\text{whipped egg whites}) - \text{Filling}$
2. $D_3(S5)\text{isomalt} - \text{Outer shell}$

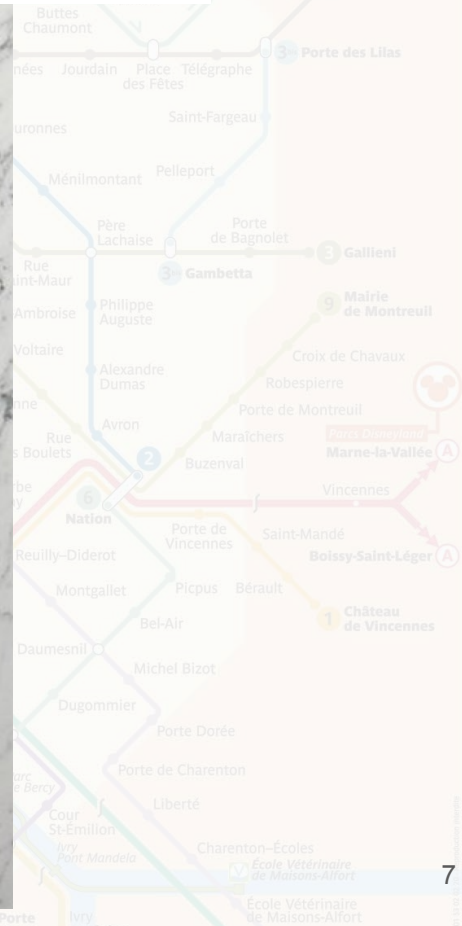

$(D_0(S1) + D_0(S2)) / (D_2(S3) \times D_2(S4)) @ D_3(S5)$
DSF for the final dish

- Notes of astringency and pungency can be added to to recipe

Scrumptious Odyssey:

*****Robustness of the proposal is yet to be tested**
